

EXERCISES ON "DIVIDING LINES" NAME:

1. Write the word or words related to each sentence:
 - A. A kind of network made of parallels and meridians to locate any place on Earth, either on land or sea
 - B. The most important line of latitude
 - C. Imaginary line that divides the Globe in two Hemispheres: the Northern, and the Southern one.
 - D. Imaginary lines that run from north to south between the poles
 - E. They run from east to west, on either side of the Equator
 - F. The latitude lines located at $23^{\circ} 27'$, either N or S
 - G. The most important line of Longitude
 - H. The angle distance between any place on the Earth and the Equator
 - I. The angle distance between any place on the Earth and the Prime Meridian Line
 - J. The area located between $66^{\circ} 30'S$ and $90^{\circ}S$
 - K. The area located between $66^{\circ} 30'N$ and $90^{\circ}N$
 - L. Each one is divided in minutes to give even more precise measurements

2. Complete the sentences:
 - A. Lines of _____ are also called _____, as they run parallel to the Equator, which is given the value ____°. Lines of _____ are numbered in degrees from _____° to _____°, as you move towards the North or the South _____.
 - B. The most important line of _____, passes through _____, London, and is numbered ____°. All other lines of _____, also called _____, are numbered in _____ either east or west of the _____. The line directly opposite to this passes through Polynesia, and is numbered 180° .
 - C. The maximum average in _____ is thus _____° either North or South, been this value given to the _____.
 - D. The maximum average in _____ is thus _____°, either East or West.

3. ¿ True or false? Correct the false sentences by changing just one word
 - a. We use meridians to measure latitude
 - b. Parallels are the same length, as they run parallel to the Prime Meridian Line
 - c. Longitude is the distance to the Equator
 - d. Longitude lines meet at the South and the North Poles
 - e. The Arctic Circle has a location of $66^{\circ} 30' S$
 - f. The Antarctic is the area between the Tropic of Cancer and the Tropic of Capricorn
 - g. The Antarctic Circle is the latitude line far north to the Equator

4. Turn the false sentences of the exercise 3 into correct ones by changing the wrong information: this time you cannot change the wrong word, you have to write the appropriate definition.

5. Fill in the blanks on the globe with the appropriate word, by using the information in the text and the previous exercises, and add the value in degrees where necessary.
